

The Department for Hungarian Music History
of the Institute for Musicology, RCH HUN-REN
warmly invites you to attend

the **first session** of its **Zoom workshop series**
exploring the theme of **Digital Critical Editions in Music**,
to be held on **29 April 2025 at 2:00 PM (CET)**.

Guest speakers

CRAIG STUART SAPP – Stanford University / CCARH / PHI

JACEK IWASZKO – Fryderyk Chopin Institute, Warsaw

TWO PROJECTS OF THE FRYDERYK CHOPIN INSTITUTE

Chopin Heritage in Open Access (2018–2021) and
Polish Music Heritage in Open Access (2019–2022)

The presentation discusses the outcomes of two EU-funded projects conducted Fryderyk Chopin Institute between 2018 and 2022.

Among the results of the *Chopin Heritage in Open Access* project (2018–2021) is the portal chopinscores.org, featuring over 500 digital scores of Chopin's first editions encoded in the Humdrum format. The platform offers advanced tools for analysis and comparison, including melody, rhythm, and interval search, tonal analysis, and dynamic score visualization.

The *Polish Music Heritage in Open Access* project (2019–2022) extends these methods to a broader repertoire of music from the 16th to 19th centuries. Creating 8,000 digital scores in Humdrum format required the development of a Git-based editorial workflow. The polishscores.org portal offers an advanced musical search engine, filtering options, and an analytical toolkit. All scores are available under an open license in multiple formats, providing a scalable model for digital editing, access, and computational analysis.
